WOMEN CALL ON PRESIDENI TO AID CAUSE

Standpoint of Social **Justice**

ALL THEY GET IS SYMPATHY

Says He Can Only Carly out Dictates of the Democratic Party as Body

WASHINGTON, Feb. 2 -- Walker sorkers who toll in the mills, sweatshops and the factories of the nation pleaded with President Wilson today for his assistance to the cause at woman suffrage. The president .vaiettully told them as he did a deligation last December that he could not gitte anything on congress which had not received the organic consideration of the Democratic party.

Today a demonstration --- not the Mary and, the street procession, the column Dennants and pattle mass of the talk ... but the tale of hardship, the structle ic live on low wages, of the samatoions for those who sickened at their work and the heart breaking tragedies of poserts—affected the president

As the delegation left the executive offices, discouraged and disappointed because they obtained no positive aid, they did not know that the president himself was depressed, perhaps even more than they, as he went to luncheon with his family. He told his friends afterward that he wished he could help, but saw no was to do it.

There is every reason to believe, however that the day gave added stimulus to the president's desire for early legislation on social justice and industrial reform mentioned in his first annual message

Five hundred women, old and young. most of them plainly dressed but earnest and determined went to the White house, but only a committee of 26 with five greekers entred and with the president, the others wi until the argument had reseed and T

OUST MURPHY IS CRY; MEET ENDSINA ROW U. S. HAS BETTER NAVY

New York Democrats Balk Tammany Rule, After Hard Struggle

TIGER HAS A CLOSE CALL

Leaders Declare Test Year's Defeat Was Due to Old Boss' Leadership

NEW YORK, Feb. 1.—A meeting of the National Democratic club ended in disorder tonight, after a resolution they demanding that Charles F. Murphy be faulty comparisons in the year book. but the congressman's optimism was 173 to 120, a metion of Representative Fourth street in the town of Ramona retired from the leadership of Tammany hall had been declared adopted on an aye and nay vote.

When the chairman announced the result of the vote the Murphy partisans and those favoring his retirement tarted a demonstration _ Fists were shaken trivis, threats were made and hard names used. It was 10 minutes tleships, before a semblance of order was re-

Friends of Mr. Murphy asserted the resolution had been carried by an ilegal vote and said they would live the matter in the form of a protest before the board of governors of the organi-

The resolution was introduced City Court Justice Edward F. O'Dwy er, president of the club. A bitter speech in reply to the resolution was made by Thomas F. Smith, secretary if Tainmany hall, whose demand that he resolution be tabled was ignored ny Justice O'Dwyer. .

O'Dwyer's Resolution.

Justice O'Dwygr's resolution read "Resolved. That we favor the immediate reorganization of the Democratic; tate committee and of the rounty committees in Greater New York That we are opposed to the present

leadership of Charles F. Murphy, and eclare it our belief that the interests if the Democratic party, its future restige and success demands his imon in party affairs."
"Instice O'Dwyer derinted that the

defeat of the entire Democratic state ticket at the last election, "for the it a majority of the votors, was not the fault of the candidates, for they were as good a set of nien as ever ran

Tammany Causad Defeat. "The cause that led to our defeat,"

he continued "was the issue that was presented to the people charging us with corruption and with being graftors. And, gentlemen, evidence has heen produced since in a court of record that proved some of those charges.

Non, I am not a grafter, and I do not intend to mingle with grafters. Some of the charges have been proved and even if some of them are not, the people have arrived at a verdict and have determined that the charges are true. They showed that at the last election and if we ever want to go before the people again with candldates we will have to get rid of that element in our party that is responsitie for this state of affairs."

Justice O'Dwyer then introduced d to be heard. He said it was amaz- German battleships, with the 9 4-10- H. Henry, an irrigation engineer and ng that Justice O'Dwyer should sav inch guns, to battleships armed with Louis Henry an electrical engineer

WOMEN CALL

ON PRESIDENT TO AID CAUSE

Standpoint of Social Justice

ALL THEY GET IS SYMPATHY

Says He Can Only Carly out Dictates of the Democratic Party as Body

WASHINGTON, Feb. 2.-Women workers who toll in the mills, sweetshops and the factories of the nation pleaded with President Wilson today for his assistance to the cause of woman suffrage. The president Mareihast December that he could not unto anything on congress which had not received the organic consideration 🖋

the Democratic party. Today a demonstration -- not the bray hand, the street procession, the ad-ead pennants and battle flags of the cause. but the tale of hardship, the struction to live on low wages, of the sauctorians for those who sickened at their work and the heart breaking tragedies poverty-affected the president

As the delegation left the executive offices, discouraged and disappointed because they obtained no positive aid, they did not know that the president liimaali waa danressed. Derhaps even more than they, as he went to lun**cheon** with his family. He told his friends afterward that he wished he could help, but saw no way to do it.

500 Women Visit White House

There is every reason to believe iowever, that the day gave added stimulus to the president's desire-for early legislation on social justice and industrial referm mentioned in his first annual message

Five hundred women, old and young, most of them plainly dressed but earnest and determined went to the White house, but only a committee of 26 with five aprabays cale 4 middle 1 with the president, the others was until the argument had ceased and 112 Wilson asked to shake lands with ail. In voices often choked with emotion,

1 don't have to make a speech to you,' said Miss Rose Winslow of the weavers, who stood breside the presidept in the group and I am so nerve our that I could not make one if wanted to because I don't uddrass presidents every day

JAPAN AND MEXICO

PRESIDENT WILSON'S statement to the Senate Foreign Relations Committee that he has recently learned that the Japanasa government is backing Huerta rests on two or three incidents which in themsalvan do not seem to be of especial importante One is the sale to the Mexican govprament of a quantity of discarded Japaman array equipment. Another is the standing of a Japanese warship to Mexico, third is the fete given in honor of Pie la Ba-re, the special Mexican envoy to

It is a common practice for the larger netions to sell discarded military and naval equipment to smaller governments. Turty, for instance, has bought second-hand warships, German artillery and Circuman small arms repeatedly. Our own government has often had opportunities to sa'l antiqueted warships to second and thir frite powers, but has not done so the sty for sentimental reasons in view of thas preceds its it is not clear why Japan should have refused to sell its old gues to Huerta. It probably would have sold them as anding to Owenigh

In saiding a warship to Mexico the J-penest did only what the British, the Certains and the French had already done. Mar dues there appear to be any particufar significance in the honors paid De la erra. At any rate it is safe to essume that the Japanese government is not seeking would with the United States, for of all first class powers in the world Japan has the best reason to avoid war. And nobody Krows this better than the responsible brads of the Japanese government.

RESTRICTING IMMIGRATION

IMMIGRATION to American ports from Exrope averages considerably more than a million people a year, of whom perhaps 200,000 eventually return to their native fand. Most of these people are from southasy Europe from Italy, Austria and the Balkan countries and in point of desirabil-My as future citizens are vastly inferior to the Scandinavians, Germans and Irlsh who thirty or forty years ago made up the bulk of the immigrants.

Aliens are subjected to an examination at the port of entry to exclude those who are obviously unfit that is, the criminal, the insane, the degenerates, and those who for any reason may become public charges. But in spite of these efforts thousands are admitted each year who speedily find their way into prisons and asylums. In New York and some other eastern states the asylums are overrun with insane and feeblepotential patients, most of whom have not been in the country more than one or two years. A large percentage of them are criminals who were admitted because their redords were unknown.

The difficulty has been increased by the practice, which prevails to a limited extent in some European countries, of giving criminals immunity on condition that they promise to emigrate to America. In Italy especially this is said to be a frequent means of getting rid of undesirables, though of course it is not done openly. But now the Austrian government has taken a different all to the confincation scheme. aftitude and hereafter all peasants leaving that country for America will be warned to make sure of their ability to pass the physical and mental examination required at Ellis Island. The reason is that the Austrian government has found that those of the people who have been deported from the United States are liable to become pub-Sc charges when they get back home, for Hey have usually spent their entire rean res to make the trip to America, and if they are deported they come home pau-

This ought to be of some advantage in seducing he pumber of undesirables adwuch charge of meterial improvement un-Ul Congress de ides to adopt the literacy

ELECTRIFYING MOUNTAIN ROADS

BLECI RIC locomotives have been used to a likelited extent on several eastern railroads for a number of years, but they have not come into use as rapidly or as extensively as the advantages claimed for them would seem to warrant. This is probably because of the enormous cost of changing equipment; nevertheless, the electric incomotive soons destined eventually to supplant the strain leasmotive.....

The Chicage, Milwaukee and St. Paur Railway Company is now electrifying a section of its mountain road about 450 miles long at a cost of between six million and eight-million dollars. It is said that with the new equipment one engine-will more than do the work of two of the present steam locomotives, and double-headers on the mountain grades will be done away with.

The almost unlimited power which can be generated from the mountain streams of the West suggests the possibility of the eventual complete electrification not only of the mountain lines but of railways at considerable distance from the source of power. The greater efficiency, the saving of coal for other purposes and the greater cleanliness in operation are advantages which will more than compensate for the cost of the change.

FLYING AROUND THE WORLD

At right thought it would seem that the San Francisco exposition authorities are perfectly safe in offering \$300,000 in prizes to the winners of en aerial race around the world. The schante sounds utterly chimerical. Nobody has yet evan attempted to cross the Atlantic in acroplane or dirigible. Nobody has ever penetrated the yest wildeness of Siberia, where an aviator's chances would be anything but attractive.

But before concluding that the thing is impossible it is well to recall the amaking things which have already been accomplished in aviation, and accomplished so often that they are now commonplace. It was only about four years after the Wrights a de their first flight that an aviator flow from Hely York to Los Angeles Long brois that the Englyl, charinel was crussed, the Alps and the And have hem suchounted, and a Frenchman flew 600 miles over the Mediterranean from Cannes to Tunis. Under the proposed plan of crossing the Atlantic by way of Labrador, Greenland, Iceland and the Hebrides, the longest flight would be 670 miles, which is an easy journey for a Zeppelin dirigible and not improbable for a high-powered aeroplane.

With such an larmense prize to be won there will be no lack of entries, and the ingenuity of the buildors of dirigibles and aeroplanes will produce craft which, if they do not actually encircle the globe, will at least establish new records in aviation.

THE SINGLE TAX

To the Editor of The Gavette:

Mr. Beyest Sinton in his endeavors to answer wank Stock Holder" has made some very presumptuous and misleading statements; namely, "All improvements upon land and personal property are to be exempt from taxation, but it does not follow that it will be napassarry to increase the tax on every home in the city to make good the loss," What proof can Mr. Sinton give that the tax on improved as well as unimproved property will not be raised? "Ayressed land values total about the same as the improvement values" (which is untime nine times out of ten). "This means that to get the same amount of revenue under single tax as at present the tax rate on land must be about doubled." Mr. Sinton is assuming a great deal, when he tells us this; for no one under heaven can tell us the amount of taxation required under the single tax because that will be ascertained by the required amount for city revenue. It may mean that we shall be taxed 10 times the amount demanded at present.

One thing is certain, property owners can never meet the assessment and this the single taxer is aware of and confiscation of all property must folow. "The extra burden of tax is going to be borne by the land speculator" (so says Mr. Sinton), is absurd and ridiculous.

It is the intention of the single taxers to strive for the adoption of the single tax in the city, then the country and then the state, which means that the suburbanites and farmers must finally give their

After studying thoroughly the single tax I fail find out whereby anyone will be benefited but the political machine of single taxers, and when they get in power farewell to all prosperity. The single taxers are constantly referring to the

very limited and modified single tax adopted in Houston, Tex.; they forget to allude to the overwhelming defeat the single tex met with in Seattle, Wash, two years ago. The two young men referred to in Mr. Sinton's article as having gone to Carada to share in the

prosperity, very likely were hypnotized by the low | rate to by the railroads and a likelihood of tak-TURTICE njugt single to*

not a species of firearms, lies in front of Elizabeth, and when the government has finished digging in it, ocean stead, ships will be able to steam right up to the town and awaken its great white way at 10 p. m by tooting for a drawbridge

Elizabeth roaky about everything from adding machines to sh'yr. It has 150 paysenger trains a dey and meny lack who have made their money in New York are building young palaces in Elizabeth. thus evening up for thet Singer building affair. The city he one dwelling house \$45 years old and nipe depots, ment of the m a little sownger. It has also many new public buildings approaching in beauty its colonial relice. It has a libered of trade which sits up -labte laying plane to wave the east side of New York over to Elizabeth, to extend the Atlantic oc " to the town and to put the Pennsylvania rail-

Entereth is 250 years old and was first named Fig-shethtown. It figured so estensively in history, however, that to save compassion and way and tear on hatorians, the name as amputated at the last joint. Frinceton university was organized in withabith and for veny years liftens pointed with price to the historical a ting of the Continental handed in 1780, and George Wassington took the fatty there on his way to be imateureted.

Elizabeth step I Light General Scoot, who came in handy the rest time Mexico got unreasonable. And when Gernal I stayatte visited America Elizabeth was too important to be everlooked.

ER sheth has fought everything from Indians to the Penusylvania railroso, and two centuries and a quarter ago the Fresbyteriens and Episcopaliens of migabeth s'- tod a civil war of ." ir own. Peace. now reigns supreme, however, and the only signs of war are those made by New York automobile owners who try to so through town without slowing down. (Copyrighted by George Mat h ... Adams.)

Photographs and Selfishness

BY RUTH CAMERON

One of my neighbors lost her husband just before Christmas. A few of us who had known her very well, and who realized how great her bereavement was, decided that Christmas would be very gloomy for her this year and promised ourselves club; it generally elects him to life we would break away from our own family circle membership.—Philadelphia Public Ledlong enough during the day to visit her. He and she were literally all the world to each other, for they had no children and their

few relatives are widely scattered. I found her almost happy.

had had his pictures taken, to to pass a child labor bill. surprise me on Christmas. You know how averse he has always been to going to a photographer. He hadn't had a pleture taken for years before. "I used to try to cove him to go, but he never would. After

he died I felt so badly about it. Of course I could never forget him or how he looked, but a picture would have been so tangible. And yesterday the proofs came. They are splendid. It seems almost like a Christmas present from him.

And she showed me the proofs. I know there are many homes where one member of the family-mother, father or son, refuses steadfastly to have a picture taken. "I do not take a stop race suicide is to pay decent good picture," or "I would rather go to the dentist wages. than have my picture taken," is the excuse phrases so familiar that they have taken place with those ready-to-use bits of conversation aptly termed

bromides. It may be that you feel this way, too. If so, you are guilty of a very common form of selfishness, although it is not always recognized as such You may feel that you do not take a good picture

and that you would rather have your dear ones remember you as you are, or that you feel selfconscious and rather foolish. But should you consuit your own wishes and teelings in this, not theirs? Do you know of any home that has lost one of its at the same time hold Joe Bristow and

members that does not treasure a picture of the departed one? Have you not lost someone -father, mother, son or daughter, for whose picture you would not take many times its weight in gold? Then why deny others this same pleasure?" A

ing from the rightful owners for nothing under the picture of ourselves is not taken for ourselves, but for others. And if they want a picture of us enough to importune us for it, why not consider them, rather is farther from our thought than a than our own prejudices?

WATER COLOR EXH.B.T. TO OPEN THURSDAY MORNING

Hung: Private View Temerrew for Society Members

For 10 days only, beginning Thursday, levers of art in Colorado Springs will have an opportunity to view a collection of nearly 100 water colors. assembled by the American Federation of Arts. Washington, from the New York and Philodelphia Water Color

The exhibit, which is now being hun? on the second floor of the Federal building, will be given by the Colorado Springs Art Society and memhers of that organization will view the pictures privately tomorrow afternoon at 3 delock. The following day. Thursday, the rooms where the pictures are hung will be open to the

Art critics the world over admit that "Mission City," has one of the most pictures done in water color are the most wonderful works in art. Only a master dare trifle with this medium of artistic expression if the resulting painting is to be anything of real

Artists of the first rank in America will be represented at the exhibition here. That the pictures are brought ill at his home, 917 North Nevada ave- to Colorado Springs under the auspices of the Art society is sufficient surety sickness may develop into pneumonia, of their worth as the collections of Mr. Peck was in Cripple Creek last last year and this have proved. The week when the temperature dropped society is blanning to open the exto 14 degrees below zero in a short hibit at night although definite antime. He returned home Thursday houncement as to that has not been suffering from a severe cold and has made. The exhibits of the past have since been confined to his bed. Mr. usually numbered but 75 pictures, but one hundred.

match or calling it off.

PHILADELPHIA, Feb. 2.-Samuel H. "Buck" Weaver, a famous baseball the remainder was the reject from the pitcher 30 years ago, died suddenly liere today. He was 59 years old. Weaver began his baseball career in 1872 and terrific speed was his great asset. He played with the organization now the Philadelphia National league team one year and was with pany from its mine and mills for the Jeties. The following year Weaver played with Louisville and led all the pitchers in the American association. He was debarred from playing in the 1984 and played with the famous Athleties until 1887, when he retired. Weaver then became a Philadelphia policeman and was placed on the pension list after serving 21 years.

The annual meeting of the company was held in Cheyenne, Wyo., yesterday, at which the following directors the men were to box, said tonight it were elected: Frank G. Peck, Dr. D. was deemed advisable to postpone the H Rice, Thomas F. Burns, Irving Howbert and Ird Harris. The directors will meet within a few days, when it is expected that the present officers will be reelected. A total of 2,511,415 shares of stock was represented at the annual meeting and voted unanimously, The annual report of Frank G. Peck,

Gold Mining Company: Throughout the year 1913 the operations of your company were carried on under favorable conditions in every department, and as a result the net earnings for that period were unusually satisfactory. The mine and the two milis owned by your; company has each contributed its quota towards this excellent showing, thus demonstrating the wisdom of the large expenditures nade in the construction of the Victor mill and the remodeling of the plant at Colorado Springs.

During the year there were 58,245 tons ATHLETIC'S PICHER, DIES of ore mined and shipped to the Colorado Springs mill, having an easely value of \$25.83 per ton. The mine also produced 127,054 tons of low grade ore, a large part of which was taken out a large part of which was taken out in the source of development work and in the course of development work, and ore shipped to the Colorade Springs plant. In addition to this, 51,108 tens of low grade ore were taken from the dumps, making a total of 175,142 tons treated at the Victor mill, of an aver

Milwaukee for two years. In 1881 and year were \$604,448, as is shown by the 1882 he was with the Philadelphia Ath-letter. The following year Weaver submitted herewith. An analysis of the same shows that \$300,000 in dividends were paid during the year 1918, \$340.000 of this amount being the rogular quarterly dividends and an extra American association for breaking the dividend of \$60,000, thus leaving surreserve rule, but was reinstated during plus earnings to the amount of \$304.448. The cash on hand January 1, 1914, amounted to \$341,088.19, after all expenses and permanent improvements were paid for. The value of the store. house supplies on hand December 31 was \$122,461.18, and ore in the bins. Dividends paid already paid for, at the Colorado Springs mill, amounted to \$101,115.41 making the total value of our quick assets \$565,564.78, which places the company in splendid financial condition at the beginning of the piesent

ing was done on this level, most of it on the No. 1 vein, on low grade ore which may be of high enough value to stope for mill ore.

Exploration Work.

During the early part of the year, No. 2 what was sunk 54% feet. bottom at this point shows good lively breccia, with small fragments of granita Transparite fragments may be a local occurrence, and may have no significance as to the centact flat-tening out or praising to the north and

No. 1 shaft was sunk 269 fast, and a station was cut on the 1,500 foot level. This shalt had been in granite all the way, with no indications of fissuring or min.44ll-ation.

At a point 190 feet southeast of No.

I shaft on the 1,500-foot level, in the granite arm, a vein was cut which in all probability if one of the Diamond system. A-sociated with it is a phono lite dike on the sust and a base it dike on the west. At the point of intelesction with the crowscut there was an unusual concentration of values, one as my giving results of 100 ounces. We have drifted on this vein a total of 70 feet, and have found the gold contents, very existic, making very little ore of shipping grads. To all appearances the drift runs on top of the ore shoot. Further development at greater depth will likely prove payable ore.

While it is a fact that the ore bodies known or unknown, occurring in the Captain and Lee vein systems tribuary to the No. 2 shaft are neither so laise nor so abundant as those already exhausted, it is remanable to expect this mineral area contains some ore. both as parts of known ore shoots and as ore bodies as yet undirecveid.
Further exploration alone will prove this theory. Should it be incorrect, a from this territory.

Drainage.

On May 4, 1918, water was struck in the bottom of the No. I shaft, at an elevation of \$,606 feet above _ta level. pending in the house, but administra- you appear years younger. Draines through the Roosevalt tunnel tion isaders a care to this date had averaged eight feet not be considered at nine inches per month. Taking into consideration the reduction of the consideration the reduction of the portal, which is now 8,200 gallons per KENTUCKIAN IS 1 minute, it is reasonable to expect that the draining of the district has been materially less during the past year. From data secured from surrounding mines, I think it safe to assume seven feet of drainage per month as a basis to resume sinking operations.

Construction and Repairs. A new six-inch water line was rut from the new main laid by the Altman Water company to our property line, to connect with the main tanks on the A system of filter tanks was installed, to catch all the waste water from the boiler rooms. This water, after filtration, is pumped back to the No. 1 boiler room and used in the boil-

rapir is the old one, which to walk out.

Fiftes 1 v. tram care yers built in our dwn chips, and it new stoping drills with added, to replace those work sat.

A new Heine 30s horsepower boiler was added to the equipment at the No. was ad al to the equipment at the No. 3 short duching the year, making the total attem capacity of this plant 1.100-hersepower. This boiler was covered by a brick addition to the boiler room, \$3846 feet in dimensions, which allows plenty of room for an additional boller or for a blacksmith shop, should was also extended to moud. edste the

new boiler, giving an additional coal storage capacity of 250 jons.

During March, the No. 1 hoist was shut down 18 days on account of the main crank shaft breaking, during which time no ore was hoteted at this plant. The shaft was welded with Thermit, and since that time has been doing its work without giving trouble, During the welding, the engine was reset and lined up carefully.

In December, no shipments were made for a period of 12 days, as the railroads were snowbound and unable to set in empty cars. The mine was shut down completely only one day on account of the storm
All machinery and buildings are now
in a good state of repair.

Summing up the results of the pass year's operations, I feel highly gratified, as from the standpoint of profit it has been the best year for the mine

mince 1908. The ore reserves stand practically the same as at the beginning of the

It is planned to do 3,500 feet of development work during the coming year on the 1,750-foot level, in the region contiguous to the known ore bodies, as soon as the shaft reaches this point. It will require from 8,000 to 10,000 feet of exploration work, in addition, to develop thoroughly your property on this level. From the experience of the surrounding mines which are mining payable ore at this syste elevation, it is unresyonable to suppose that all of this work will be

barren of results. The same policy of development work on the upper levels in the known ore sones will be carried out, and will probably amount to 10,000 feet for the

In conclusion, I desire to thank the heads of the departments, and the office and engineeing force, for their loyalty to the company and their cooperation with the management, as well as all the employee of the mine for their efficient work. Respectfully submitted,

F. L. SMALE, Meneger.

Dr. Pierce's Favorite Prescription Has the

(in Tablet or Liquid Form)

has helped thousands of suffering women to

> Better Health, Greater Strongth, Brighter Spirits, Better Looks.

The Favorite Prescription is prepared from the natural remedial herbs growing in our native forests -without alcohol, without narcotics. It is a restorative tonic. It corrects nervous initability, exhaustion and the distressing symptoms of derangement of the feminine organs.

The Dr. Pierce's Favorite Prescription has been sold in liquid form for over forty years. It can now be had from all dealers in medicines in either tablet or liquid form—or send 50 cents in one-cent stamps and obtain a trial box of tablets by mail. Address: DR. PIERCE, Invalids' Hotel, Buff-lo, N.Y.
